

Pintu Kumar

Software Engineer

kushwahapintu903@gmail.com | +91 8744941083 | Bihar, India | linkedin.com/in/pintukumarr

PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience in designing and optimizing scalable backend systems using Java, Spring Boot, and RESTful APIs. Experienced in business logic development, server optimization, task automation, and secure API integrations, with a strong focus on performance, reliability, and maintainability.

SKILLS

Frontend Technologies: HTML, CSS, JavaScript

Backend & Languages: Java, REST APIs, Object-Oriented Programming (OOP)

Databases & Caching: MySQL, SQL, RDBMS, MongoDB, Redis, Data Modeling

DevOps & Systems: Docker, Linux, Git, Bitbucket, Server Optimization, Automation

Frameworks & Technologies: Spring Boot, Spring Security, Hibernate, Web Services, JWT

Testing & Tools: Postman, API Testing, Integration Testing

PROFESSIONAL EXPERIENCE

Avarna Technology LLP, Software Engineer

May 2023 – Dec 2025 | Remote, India

- Implemented and optimized scalable backend business logic using Java and Spring Boot, supporting high-throughput workflows while improving system performance, reliability, and maintainability.
- Managed and optimized Linux-based servers and cloud infrastructure, ensuring high availability, fault tolerance, and proactive issue resolution through server-side tuning.
- Automated operational tasks and backend workflows, reducing manual effort and improving deployment efficiency and system productivity.
- Developed secure RESTful APIs with JWT-based authentication, RBAC, and Redis caching, enabling fast, reliable, and secure inter-service communication.

PROJECTS

Masai Learn

- Built RESTful backend APIs using Java, Spring Boot, and Hibernate to manage tutorials, modules, and topics, improving scalability and platform extensibility.
- Implemented JWT-based authentication and role-based access control to secure user access and protect application data.
- Designed MySQL relational schemas supporting prerequisites, progress tracking, and certificate generation; validated APIs using Postman integration testing.

Gradigi

- Architected and developed RESTful APIs for managing presentations, teams, and evaluation sections using Java, Spring, and Hibernate, enabling real-time grading and Admin-User collaboration.
- Executed secure authentication and role-based authorization using Spring Security and JWT, ensuring controlled access to presentation evaluation and platform features.
- Performed integration testing with Postman, and documented APIs, database schema, and application logs to improve maintainability, reliability, and deployment readiness.

EDUCATION

Masai School, Full Stack Web Development

Mar 2022 – Mar 2023 | Bengaluru, India

Higher Secondary Education (CBSE), RSBV No.2

Apr 2019 – May 2021 | New Delhi, India
